THE OLD GUARD SPEAKING. The Winnebago nation held a grand Council here this day. The tribes turned out in all hall so great. Fair, candid judges estimate
the number of people at 15,000 to 18,000. It
would equal all the meetings put together that
"Skim-milk" Allen has addressed in northern
Illino's during the campaign. The WideAwakes of Rockford and neighboring towns

turned out a regiment 600 strong.

The Republican ladies thread for them an excellent dinner in their large drill room. The day was designful, and sverybody seemed happy and brim-full of enthusiasm, and resolved to roll up such a majority for Lincoln and Yates as will appel the pro-Slavery Douglasties, and make the Republicans shout for joy. Winne-bage is bound to be the banner county of Illias will appel the pre-Slavery Douglasites, and make the Espublicans shout for joy. Winnebage is bound to be the banner county of Illimois in 1860, as she was in 1856. Mr. Bagan made the opening speech. It was a fine, effect, devoted in part to the Homascad question and to showing the utter disregard and guestion and to showing the utter disregard and contempt of both Democratic factions to the interests of the masses. Mr. CLAR addressed the vast throng for two hours, who listened with the despeat attention and silence, save when his sharp hits and strong points elicited bursts of applause. He drew a startling portrait of the Slave power and its iron rule, and recited his South, and exposed the swindle called Squater Sovereignty, which Douglas is practicing on the people of the North. He proved that the little dodger was committed up to the eyes to the Calhoun heresy that the Constitution recognisms properly is man and carries always into the Free Territories—a doctrine that utterly destroys Squatter Sovereignty. He showed that there was nothing to choose between the three these problems of the constitution of

there was nothing to choose between the three pro-slavery factions represented by Douglas, Bell, and Breckinridge. The speech was one of the greatest ever made by Mr. Clay, and produced a profound and enduring impression upon the minds and hearts of the vast audience. The people call him the Lion of the South—the dauntless and immovable Lion of Liberty on Stave soil. This has been a great day for the cause of freedom in the pld Gibraltar of Republicantum. MECHANICS' INSTITUTE FAIR. The Great Industrial Exhibition.

POURTH DAT AND NOTES OF THE PAIR The Wigwam on Saturday bugged like a be The Wigwam on Saturday bussed like a bea-hive; crowds of visitors were coming and going, and in the ample interior found space and verge emough, with planty of objects for attraction and interest. The motor power of the Fair is a beautiful engine, noiselessly deing its work and driving a mixed variety of ma-chines from the great Quarta Mill to a Mortising Machine, or Corn Sheiler. This engine is con-tributed by Mesers. Walworth, Hubbard & Company.

Much attention is attracted among practical men, and others, risiting the Fair, by the new Quartz Mill of Messra. W. H. & Ives Scoville of this city, and manufactured by C. Reissig & Co., thus being the product of Chicago ingenuity and akill, and worthy for that reason of a more extended notice. It has indeed merits that will win for it anywhere the attention of all interacted in membranes of its slaw. The disponent cated in machinery of its class. The discovery of the new gold regions has stimulated a was amount of thought and industry to secure and perfect appliances by which the quarts rock may be made to yield its treasures, and our Chicago mechanics have brought out several machines designed to perform the service.

The principle of all of these is that of cruding, either by stamps or rollers, but there has been a desideratum beyond this. Let any one undertake the crushing of some hard substance in a mortar, he will find it cannot be reduced to impainable powder by downward blows merely,

tion of the material that is gritty, or simply fine sand. So, of rollers set however close,

The Messrs. Scoville are the inventors of machine which introduced a new era m sten ry. A set of jewelry in hair landscape is a su-perb affair. They have "no end of " rings and reaking. Their Quartz Mill is an adaptation of their ers with this community, comes out strong with a great inst each abow of Kerosene Lamps and Fixtures. Brown noes for & Wilder have Gas Fixtures in every style and Stone Crusher (two stout from cylinders with serrated chilled surfaces revolving against each other,) as a preparatory to the appliances for writely.

We were greatly pleased with the inspection of a goodly array of woolsn fabrics and yarra, from the maguifactory of J. G. Stolp, of Aurors, Kane county. The Cassimeres and Satinetts are smooth, even, and excellently well finished.

Messars. A. & H. Kobp. Clothiers, exhibit an evercoat of superb workmanship and finish. It the grinding process. The "Arastas" is of a class of machines better named as the "Chilian Mill," and this the Messra. Scorille have, in a most ingenious and skillful manner, com-bined with their Stone Crusher.

I. B. Seeley contributes a case of Riggs' Pat-ent Hard Rabber Truss, much commended by the medical fraternity.

John Hughes, Plumber at No. 51 Washington— street, has on exhibition a glittering array of 'fnely plated Plumber's Pittings which a card appended, declares to be intended for the "new The added parts are a series of wheels re The sound parts are volving in a track or gutter, six feet in diameter. The parties to the Douglas-Belleverelt fusion a New York are already beginning to have "saling sense" of this fact, and will probably known shell clearer apprehension of it before the station. The chief point of difficulty is at to whether the ten Bell Electors, in case of the section, shall vote in the Electoral College for Bell or for Douglas. The corn fields rustle with some nine hundred millions of bunbels of grain, still in the ear, and oats, barler, and other cereal products are in the same scale of abundance. Never were the prospects of a harvest more satisfactory, and never, since the settlement of the country, was it more peeded or more grasfully received. It now becomes interesting to study the probable effects of this magnificent crop, and as we examine the subject we find a grouped unfolded to the view extending beyond anything hetherto claimed by the future of the West. Three years of partial crop failure have passed away. The disheartened farmer looked gloemily as his unproductive fields and curtualed his expense. Labor found but scanty empley neal and poor pay, and the traders saw almost an exhibit, and became unsable, and everywhere and upon everything settled down a thick, dark cloud of adversity. The steamship Africe. Capt. Shannen, from Liverpool August 18, Queenstown 19, arrived this morning.

The news is important. The landing of a portion of the forces in Calabria is confirmed. The Paric Patric of Friday evening, the 17th gives particulars of the states of the Garbaldians on the Calabrian Forts, and of their successful descent at several points in the neighborhood of Saylis and Petro. It appears, from a correspondent of that journal at Farc, that several intile attempts to effect a landing had been made previously to the 11th; but during the middle of that night an attack was made simultaneously on the fortifications at these points by a considerable body of volunteers, on the landward side, indicating that the disembarkation had been made unperceived. A lively cannonade was heard by those at Farc, which lasted for a considerable time. At daybreak, a small vessel, chased by a Nespolitan corrects, from which she narrowly excepted, fook refuge under the fire of the guns of the Farc Fort, and the corrected d and sater within range. It is a didd, that an infusibilitat of Regric, who had grived the following improving at Farc, positive, ly asserts that in the ununtains of Asprimento more than eight thousand Calabrians are in arms, and that they intended, if possible, to effect a justedion with the Garibaldians the same svening.

The Rev. W. Mallahon, a venerable Methodist minister, is writing reminiscences of his surly He. He founded the first Methodist church in Huntaville, Ala. The scene of the following associate is somewhere in interesting of the State:

I had preached this year to a hardened congressition of wealthy simpers, where there was no concept, and is suppose they thought them an airrea "free from the dead," so far as pay was concepted. When I was preaching my last, sermon to them, I remarked that I had been preaching to them for some time the best I could, and that if I had not preached as well as others, I had preached as them, a googel as may other man ever did; that for all my labor among them, I had not preached as would way my little flaguer with ercons. discord? The only chance of governing united listly would probably be by a despotum, and thus internal freedom would realily be secrificed to external expansion.

There is, however, some danger that Garibald will not be anfired to accomplish the liberation of Southern Italy without opposition. It is confidently asserted that the action of Anataria towards Sardmia becomes more and more hoatile, just as the success of Garibaldi becomes more clear and decided. Whether right-liver that Garibaldi will never decist from his onward course so long as any portion of Italian soil remains in the hands of a stranger. Nay, more, it is confidently said that his intention is to stated Austria in the only province left her, and, by, a second Sofferino, to wrench Vonctia from her hands. The questions we said ourselves is, will such a success on the part of Garibaldi secure the chject he hand, give rise to a second war, more disastrous even than the preceding? Hitherto Italy has won her principal victories with the blood of strangers. Now, if we believe what we hear of the intended proceedings against Austria, she is about to wage the conflict exclusively with her own. There ought to be no self-deception in the matter. Nothing but the absolute impossibility of raising a florin or moving a man can induce Austria to submit to the loss of Venetia. That she is expable of sudden and vicelar resolutions, Austria showed distinctly last year by her ill advised advance across the Tiono. Heavy as the blow she has received may be, she is not sufficiently humbled to observe, without resistance, the present course of events in Italy, We are hardly permitted to doubt that the oward course of the fortunes of Garibaldi will bring him, and probably seek to regain by the aword, in 1860, that which should have nothing to fear in the prospects of united Italy; but, unhappily, the campaign, if one should ensus, will be decided, not by ladvidual bravery, not by revolutionary esthadassom, but by the disciplined valor of well trained troops, by superio Watching Him.

Douglas and Mr. Bell, they have got on their sign. "Erin E Pluribus Unum Go Bragh." It is neither Irish—it ha not the getuine brogue of "Swate 'Ould Ireland,"—neither is it good American."

Sale of Gov. Bissell's Library.

The action sale of the late Gov. Bissell's Library yesterday, by Mesara. Reeves & Clark, was fully attended, and the bidding was very spirited. The collection of books is an extensive and valuable one. We learn that the sales yesterday amounted to about \$1 000, and that some of the most desirable works in the lot still remain unsold.—Springheld Journal. The Freeport (Itt.) Journal says:
The Illinois Central and Galena and Chicago
Union Railroads have made arrangements to
load grain at air points on the Mississippi river,
above Danienth, in bulk in barges, and transfer
to cars of above companies by an elevator at
Dunleith, thus drawing a large amount of trade
which has hereicfore gone to St. Louis over this
line to Chicago. A strong effort is being madtine to Chicago. A strong effort is being madtine to Chicago. A strong effort is being madtine to Chicago. A strong effort is being madtive to the trade and travel between the East and Northwest over this line.

Gaccar. La Forma, August is, 1800.

Dear F.: You are looking, no doubt, about these days, for a fulfillment of the promise I made you before I left. Chicago, to write you. It would have afferded me pleasure to have complied with this promise long ago; but many circumstances prevented. Some of these I will click the state of the complete with this promise long ago; but many circumstances prevented. circumstances prevented. Some of them I will give you now that you may better judge of my necessity for mexense.

I strived at Denver on the morning of the the of July, where I remained only three days, when I came to the determination to locate and take a section of land for farming and graping purposes. I started back down the Platte which the second state of the second departments shall each observe in prints duties.

I have been extremely busy building log cabias, &c. forming districts and associations, by laws, rules of government, &c., until with two weeks since, which I have a strong force at haying; and this require dall my time.

Caches La-Poudre is a Spenish word and signifies a place of hiding, or concealing powder, and in an early day the French and Indians had supplies of this article concealed among the bluffs along this valley.

The river is a beautiful atream of water which is clear and cold, coming from the snow covered mountains, about 21 miles above us, and affords us all kinds of fish, mountain trout, shad, suckers, &c.

Thus, you see, we are 60 miles away from the Post Office, and have been to Deaver only once since the 12th of July. In my opinion, it was folly for us to think of mining with our amount of capital and condition of health, together with the rain and water we would daily encounter in President.

The also-pof war St. Louis arrived at St. Domingo July 29th. The morning previous a
Spanish frigate landed a number of emigrants
and arms. It is suspected that Spain was trying to recover authority over that section of the
sland. There were soveral cases of yellow
fever in the harbor. From Texas.

objects along the route attract our attention, and nearly make us forget the hardships we have to endure. Some portions of the way the country is beautiful, and others quite mountainous. I have not time to give a minute description for I must write a few words upon another subject before I send this. The Indians are, as a general thing, quite friendly, although quite annoying with their entreates for "Sug" (Sugar), "Yaco" (Tobacco), and their disposition to steal little articles about our eamp. The white Indians are more destructive than the quarts mines are generally thraining out well, while the majority of "guich," miners find it unprofitable.

Some, however, have good luck and make well, while others loss time and money and find mo gold, and return broken-hearted to the States. It is surprising strange to see with what foolish ideas some come here from the States within their heads. They expect to shovel gold up as you would potatoes, apparently, and of course all such are bitter in their denunciations of Pike's Peak. I think a man can make money here, but he needs capital to start with, as a general thing.

nounces this statement to be totally without foundation.

One of the principal reasons for goins on the line of this read for our Camp Meeling was that no Sabbath trains were run. We do not violate the sanctity of the Sabbath ourselves, nor do we desire others to do a.

A Committee was appointed to wait on the Superintendent of the road and request him not to run a train on the Sabbath. He postively assured the Committee that no train should be run on the Sabbath. A portion of the Committee waited on Col. Heary Smith, and he said they never had run a train on the Sabbath, and if the Committee do not desire it they never would. On Wednesday the Colonel and Mr. Dunlap cene to the ground to see the Committee. Col. Smith stated to the Committee that an outside press had been brought to bear upon the Company to run a Sabbath train, and he stated that the Committee unanimously refused to make the request.
